AUTHOR Greenberg, Stu
TITLE Observational Learning and Imitative Behavior in Children: A Bibliography.
PUB DATE Jan 76
NOTE 75p.

EDRS PRICE MF-$0.83 HC-$3.50 Plus Postage
DESCRIPTORS Aggression; Behavior Development; Behavior Patterns; *Bibliographies; *Child Development; Child Language; *Child Psychology; Children; Developmental Psychology; *Imitation; Language Development; Learning; Learning Processes; *Observational Learning; Psycholinguistics; Socialization; Speech Pathology

ABSTRACT

Approximately 1,500 published and unpublished books and articles are listed in this bibliography on the broad area of observational learning in children which includes modeling, imitation, and vicarious conditioning. The majority of sources listed are dated from the 1960's and 1970's although some date as far back as the 1930's. Research in such related disciplines as psycholinguistics and speech pathology, which touch on observational learning in children as well as in other age-group populations, is also included. Those items on the list published after mid-1975 are limited primarily to articles in the core source journals and deal specifically with the subject of the bibliography. A list of abbreviations used for entries from scholarly journals is provided. (Author/MK)

****
* Documents acquired by ERIC include many informal unpublished *
* materials not available from other sources. ERIC makes every effort *
* to obtain the best copy available. Nevertheless, items of marginal *
* reproducibility are often encountered and this affects the quality *
* of the microfiche and hardcopy reproductions ERIC makes available *
* via the ERIC Document Reproduction Service (EDRS). EDRS is not *
* responsible for the quality of the original document. Reproductions *
* supplied by EDRS are the best that can be made from the original. *

This document is a listing of references in the broad area of observational learning including modeling, imitation, and vicarious conditioning. The primary sources have been published articles dealing with psychological research on observational learning in children. As sources soon referenced other sources, the scope came to include research in other disciplines -- especially speech pathology and psycholinguistics -- and with other subject populations. A listing of the source journals (and abbreviations) follows.

The philosophy has been one of inclusion of related areas rather than exclusion of all but a limited core of psychological research in the hope that more individuals will benefit from the endeavor. Intensive cross-referencing and searching occurred through mid-1975 after which articles were included only as they appeared in our central source journals or were generously supplied by their authors. Any authors who find their work omitted, please forward to me a copy of any relevant manuscript for inclusion in future updates and revisions.

This project could not have been completed without the efforts of many students and colleagues and the considerable skills of Ms. Eileen Wetrich, to whom I am very much indebted. Any omissions or errors remain clearly my responsibility.

A necessary word about costs. Copies of the most recent revision of this manuscript are available free from the author. However, the cost only of duplicating and mailing exceeds $1.50 per copy. Any contribution to help defray these costs will be most appreciated.
